IDENTIFICATION SOLUTIONS

IMAGE TECHNOLOGY

ANTIMICROBIAL THERMAL WRISTBANDS

IMAGE ID bands - high quality, cost effective direct thermal wristbands are used for Patient Identification in the he healthcare sector and for Revenue & Crowd control in Amusement & Leisure sectors. These are used where ever a secure and visual means of identification is needed like Admission Control, Age Verification, VIP Access, Group Identification, Crowd Management, Security, Event Management, Advertising and Branding.

IMAGE ID wristbands successfully stand out for their exceptional quality, competitive pricing and versatility. These have a tested 100% scan rate and are non-transferable, tamper evident, stretch and water resistant.

The company caters to the requirements of its large global customers by customizing their barcode wristbands orders. Custom options include linear or 2D barcodes, single barcode, multiple barcodes, serial numbering, logo/ artwork imprinting, and variable data printing.

SPECIAL FEATURES:

- Improves Patient Safety with positive Patient
- Antimicrobial coatins (medical grade)
- Identification Print variable data, barcodes and other ticketing related information on demand
- Designed for compatibility with most popular direct thermal printers
- Digitally printed bar codes are crisp and clear for high scanability and tight security
- Bar coding improves operational efficiency while preventing data entry and collection error
- Helps prevent counterfeits and internal theft
