

Trace, secure and manage your devices with **Virtual Locker software.**

Vlocr is our asset management software solution, empowering you to reclaim control over your mobile computing ecosystem.

Tired of spending money on missing mobile devices?

Vlocr software keeps your devices accounted for and productive for much longer, **saving you time and money on device loss.**

Say goodbye to disruptions in crucial workflows caused by misplaced equipment with Vlocr. You'll never wonder where devices are again.

Whether employed as standalone software or seamlessly integrated with our hardware solutions, Vlocr enhances workplace efficiency.

Trace

Locate devices quickly with live GPS mapping and BLE beaconing technology.

Secure

Vlocr's Remote Alarm deterrent and security features help protect devices from theft.

Manage

Get real-time, 24/7 visibility of your devices and usage with the Vlocr client portal.

Why use Vlocr?

Optimise operations

Offering the capability to proactively manage devices through Shift Pattern and RMA Management, as well as automatic tracing and auditing, Vlocr software can help you minimise downtime, speeding up operations.

Save money

Experience substantial cost savings on asset shrinkage with Vlocr software. By making assets fully traceable, it eliminates the cost of replacing missing devices, allowing you to allocate your budgets elsewhere.

Protect assets

Vlocr software not only makes it easy to locate problematic devices, but also protects them from theft. With the Remote Alarm feature, you can send a notification to a missing device, creating an audio alarm.

Increase accountability

The Vlocr dashboard gives you full visibility of assets, battery usage, and in/out timings for easy auditing. It enables employees to self-serve, providing greater independence but also increasing accountability.

“

Did you know?

Vlocr software is compatible with nearly all rugged Android devices including PDA type, wearable, pistol grip and tablet.

It can also pair with and fully track your Bluetooth ring scanners and mobile printers.

Technical Specifications
