COBI REHAB[®]
The Positioning Company

XXL-Rehab Shower commode

We have aimed at designing the best shower commode on the market. It is designed for easy access, independence, safety and on the caregiver terms.

The inside width of the chair is 61 or 71 cm, but using a 5 cm high PU foam seat and 7 cm free space to the armrests allows the body mass to fall down, instead of fading out to the sides. The impossible “wide inside but small outside” is obtained. This allows the XXL-Rehab Shower Commode to pass through nearly all modern doorways.

The footrest is always the weak point when it comes to bariatric products. Normally the producer makes a short cut here, by using a standard solution. We did not only design the footrest to carry 100 kg each, we did more!

The footrest is also side/width adjustable, so access to intimate hygiene is possible and people with the fat-tissue placed on the inside of their leg can sit with legs apart (up to 110 cm) and still have foot support. The brand new footrest is even nicely covered with PU foam.

One of the unique new features is a split toilet seat, a long open hole: 44 cm and 22 cm at the widest point. This to enable a correct use of the chair, it eases access for caregivers and avoids incidents where material ends up in places it wasn't meant to end up!

The ability for bariatric users to reach far back to reach the armrest is usually not present. Therefore we have made the armrests with a length of 64 cm and let it stick out 7 cm from the seat base, ready to welcome and support the hands of mobile users. It enables the user to get into the chair by him/herself. Another option is the butterfly armrests. Butterfly armrests add 14 cm to the seating width.

The space between backrest and seat has a clearance of 32 cm. This gives space for a possible bulbose gluteal region, but also enables the caregivers to reach for the sling and position the user better.

- Long armrests provide easy access
- Extra seat width with butterfly armrests

MAX 325 kg

XXL-Rehab Shower commode wheeler

We have aimed at designing the best shower commode wheeler on the market. It is designed for easy access, independence, safety and on the caregiver terms. The 24" rear wheels provide more directional stability and smooth pushing.

The inside width of the chair is 61 or 71 cm, but using a 5 cm high PU foam seat and 7 cm free space to the armrests allows the body mass to fall down, instead of fading out to the sides. The impossible "wide inside but small outside" is obtained.

The footrest is always the weak point when it comes to bariatric products. Normally the producer makes a short cut here, by using a standard solution. We did not only design the footrest to carry 100 kg each, we did more!

The footrest is also side/width adjustable, so access to intimate hygiene is possible and people with the fat-tissue placed on the inside of their leg can sit with legs apart (up to 110 cm) and still have foot support. The brand new footrest is even nicely covered with PU foam.

One of the unique new features is a split toilet seat, a long open hole: 44 cm and 22 cm at the widest point. This to enable a correct use of the chair, it eases access for caregivers and avoids incidents where material ends up in places it wasn't meant to end up!

The ability for bariatric users to reach far back to reach the armrest is usually not present. Therefore we have made the armrests with a length of 64 cm and let it stick out 7 cm from the seat base, ready to welcome and support the hands of mobile users. It enables the user to get into the chair by him/herself. Another option is the butterfly armrests. Butterfly armrests add 14 cm to the seating width.

The space between backrest and seat has a clearance of 32 cm. This gives space for a possible bulbous gluteal region, but also enables the caregivers to reach for the sling and position the user better.

- XXL-Rehab Shower commode wheeler with 24" rear wheels is easy to drive for the attendant

XXL-Rehab Shower Commode Rise N Recline

The XXL-Rehab Shower Commode Rise N Recline lifts the user from 55 to 100 cm and has a weight capacity of 325 kg Safe Working Load. It is the world's first shower commode for bariatric users that automatically can reach a 20 degree tilt position by pushing only one button. The chair tilts slowly while lifting the user and reaching a 20 degree tilt in the highest position.

A truly ergonomic multi-purpose hygiene chair

The XXL-Rehab Shower Commode Rise N Recline was developed in response to the growing trend towards showering in bariatric care and skincare as traditionally used methods are uncomfortable for the user and impose strain on the caregiver. The innovative ergonomic design of the shower commode is highly versatile and can also support better routines for washing/showering, hair washing, wound care, toileting etc.

Enhancing lives

The XXL-Rehab Shower Commode Rise N Recline can enhance the quality of life by making assisted showering and other hygiene routines not only safer and more comfortable, but also a more dignified experience.

Making tasks easier and safer

Ergonomic design, battery-powered assistance and the Care Raiser function removes the stress and strain from showering and other everyday hygiene routines, allowing the caregiver to work in a safe and ergonomically sound way.

Improving care, efficiency and communication

This shower commode raises the efficiency of care because it enables a single caregiver to perform the whole showering procedure, as well as a wide range of everyday hygiene tasks. The high level of support provided by the shower commode results in streamlined routines that offer considerable time savings compared with traditional methods. It also enables the caregiver and the user to maintain eye contact for better communication.

- The Care Raiser function is unique, as it lifts the lower part of the user's body to enable easy and discreet access for sensitive hygiene tasks.
- The high backrest and sturdy armrests provide optimum user support and security.
- The reclined position gives full access for the caregiver to most parts of the body and is very comfortable for the user.

XXL-Rehab Shower Commode Tilt

The XXL-Rehab Shower Commode Electric Tilt has a 32 degree tilt position and a weight capacity of 325 kg Safe Working Load. This shower commode is designed to provide a comfortable alternative showering system in instances where the prone position might cause discomfort or distress to the user. It may also be used in circumstances of limited space providing a bathing solution where other units may not have room for operation.

Making tasks easier and safer

The XXL-Rehab Shower Commode Tilt provides better access for the caregiver in terms of hygiene, skin and tissue care as well as nursing/dressing feet in standing position, allowing the caregiver to work in a safe and ergonomically sound way.

Improving care, efficiency and communication

This shower commode raises the efficiency of care because it enables a single caregiver to perform the whole showering procedure, as well as a wide range of everyday hygiene tasks. The high level of support provided by the shower commode results in streamlined routines that offer considerable time savings compared with traditional methods. It also enables the caregiver and the user to maintain eye contact for better communication.

Suitable for

The XXL-Rehab Shower Commode Tilt is suitable for patients with reduced muscle tone, pressure ulcers, spasm, involuntary movement, amputations or stroke patients.

- Electric tilt up to 32°
- The high backrest and sturdy armrests provide optimum user support and security
- The reclined position gives full access for the caregiver to most parts of the body and is very comfortable for the user

XXL-Rehab Shower Bench

Strongly engineered and functionally designed exclusively for bariatric users!

The armrests are constructed so they go beyond the seat. This makes it easy both to get a good grip when a person wants to sit down but also to get up again.

We have designed the armrests to bend out like a butterfly, so the body doesn't get squeezed, getting in and out the shower bench. The butterfly armrests of the XXL-Rehab Shower bench also provide much better functionality for the user, compared to other shower benches with straight and short armrests where it is almost impossible for a bariatric user to get a good grip.

The height of the shower bench is adjustable from 44 to 59 cm. It is very important to adjust the shower bench to the right height to have success getting in and out of the bench. If the shower bench is too high for the user, the feet will lift off the ground, making it hard to get seated in the shower bench. If the shower bench is too low, the user will have trouble getting up.

It is often a problem for bariatric users to be seated comfortably. Sometimes the seat depth is too short, sometimes too deep and with no back support. We have designed the seat to be individually adjusted to provide a comfortable seating. The backrest can be moved +/- 6 cm and the bended tubing assures that the right comfort can be found.

It is easy to clean the XXL-Rehab Shower bench with its removable seat pad. No tools are needed.

It is also made easy to both handle and move the shower bench from place to place. In the construction of the shower bench we have only used high-tech lightweight tubing, to provide the highest strength at the lowest weight.

XXL-Rehab Shower Bench	
Maximum weight capacity is	325 kg
