BALANCE N

Bullson

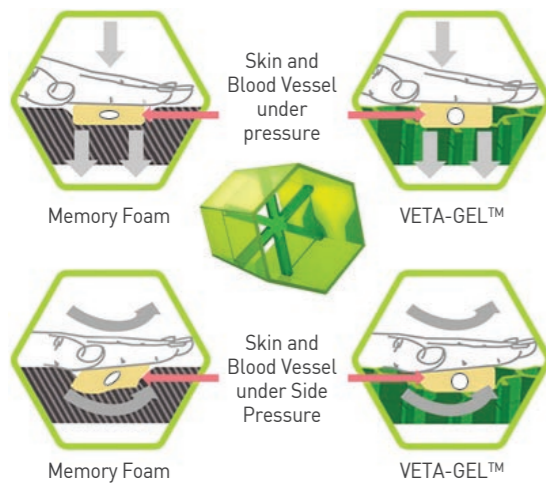

• Double-Layers VETA-GEL™

- Highly elastic special polymer with 99.9% antibacterial and non-skin irritating effect!
- VETA-GEL™ is a combination of Skin-safe oil and the special polymer
- Excellent elasticity and restoring properties of it disperse pressure forced by weight and absorbs external impacts and fine vibrations.
- Heat stability up to 70°C without shape change

• Prevention Technology for squashed, twisted skin and blood vessels.

The high-density and high-elasticity of the Double-layers honeycomb structure of the VETA-GEL™ provides the optimum dispersion of pressure applied to the hips and thighs, helping to reduce pressure on the skin and blood vessels.

• KRATON polymers

Kraton manufactures biobased chemicals and specialty polymers that deliver exceptional value and enhance the lives of people all over the world, over 70 countries with more than 800 customers in the world.

• Honeycomb Structures

Honeycomb Structures are diversely applicable to architecture, F1 Machine and High Speed Train(TGV) for withstanding the weight

• Double-Layers Honeycomb Technology™

It is patented new technology derived from the honeycomb technology for withstanding weight (Buckling & Compression) of building in architectural engineering and its hexagonal structures are developed by millions of 3D graphic design tests. The technology enhanced its quality with Double-layers pressure dispersion structure having a thin-upper layer for hip and a thick-bottom layer.

• Air-pumping System™

Each Air-cell of the Double-layers Honeycomb VETA-GEL™ expels air and absorbs fresh air providing a comfortable sitting/ resting experience.

Comparison with Latex & Memory Foam
Double-Layer VETA-GEL™

Latex (1 st Generation)	Memory Foam (2 nd Generation)	Double-layers Honeycomb VETA-GEL™ (Latest Generation)
<ul style="list-style-type: none"> • Chemical additives + Natural rubber • Made for shock proof • Too Hard to wash (lack in sanitation) • Hardened at high temperature and generate white powder • Easily torn out & lose elasticity • Different and various quality and performance based on price 	<ul style="list-style-type: none"> • Poly Urethane • Made for momentary shockproof • Washing impossible (lack in sanitation) • Hazardous VOC (VolatileOrganicCompound) can bevolatilized • Easily torn out & decrease in restoring force lose elasticity 	<ul style="list-style-type: none"> • Safe oil used for cosmetic+ Special Gel Elastomer • Made for dispersing pressure in long time • Easy to wash • High Durability at high Temperature (70°C) • Air pumping by an independent Hexagonal Pillar • Reasonable price with long life use • Not easily torn out • 99.9% antibacterial

BALANCEON SEAT

BALANCEON SEAT (M)
Gray / Green / Orange

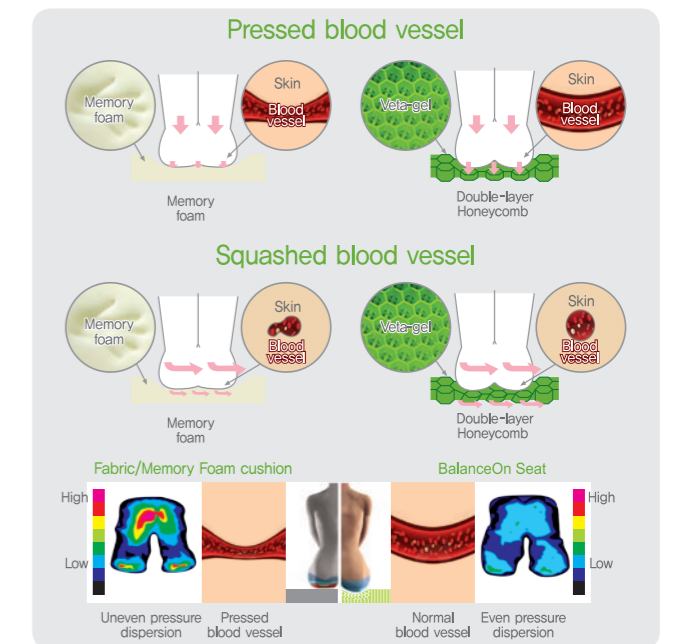

BALANCEON SEAT PORTABLE
Opened / Folded

The NST-1000 + technology combines with the weight of the VETA-GEL™ material to provide the Non-slip and high grade mesh fabric cover. Further, it helps maintain proper posture while sitting for long periods of time.

• Special Performance

• Prevent the compressed blood vessels and Skin with BalanceOn Seat!
