ABOUT US

Company information

Funke Medical AG - since 1988

The Funke Medical AG is a German company, which manufactures high quality medical systems for seating, lying and positioning of patients. The production takes place at three locations with a production area of 17.800m² in Raesfeld, in North Rhine-Westphalia. The products are manufactured exclusively in Germany.

The Funke Medical AG is the market leader in the field of decubitus prophylaxis and therapy for homecare in Germany. It is an international operating company, which already has long-standing business relationships with over 1.400 customers from the medical trade and clinics within Germany and abroad.

With the certification according to DIN EN ISO 13485 the Funke Medical AG is authorized to manufacture

medical products and to sell them in accordance with relevant legislation. These quality management systems are constantly checked and recertified by certification bodies and public authorities. As a result, the company is constantly developing.

Internal, the quality is ensured by a quality management officer, a safety officer in accordance in line with § 30 Medical Devices Act (MPG) and a qualified person in accordance with MDR 2017/745.

The Funke Medical AG is distinguished by its outstanding medical competence, continuous high quality and reliable delivery capability.

We look forward to hearing from you soon!

Environmental responsibility

Energy is a valuable resource that we need for our production. In order to use energy most efficiently we have taken the following steps:

Since 2012, we generate 250.000 kWh of electricity from solar energy using 4 photovoltaic systems. The produced amount covers about 65% of our own demand. This means that approx. 130 tons less CO₂ will be emitted into the environment every year.

Our seat cushion cartons are made of paper that comes from responsible forestry. They are also provided with a fresh seal instead of an additional film. In this way we save 6 tons of foil per year.

Our GREENLINE mattresses are made of ECOLAST® foam. Compared to conventional decubitus therapy mattresses (*standard foam mattresses or alternating pressure mattresses*) they have approx. 22%* less CO₂ emission.

We want to preserve our natural resources with all these energy-saving measures in order to live up to our environmental responsibility.

**THE WORLD IS A FINE PLACE
AND WORTH FIGHTING FOR.**

Resource saving (money and workforce)!

Decubitus therapy mattresses with evacuation function

All mattresses in this range are equipped with an evacuation function. This means that you can evacuate patients quickly and easily without transferring them on rescue sheets or carry them on stretchers!

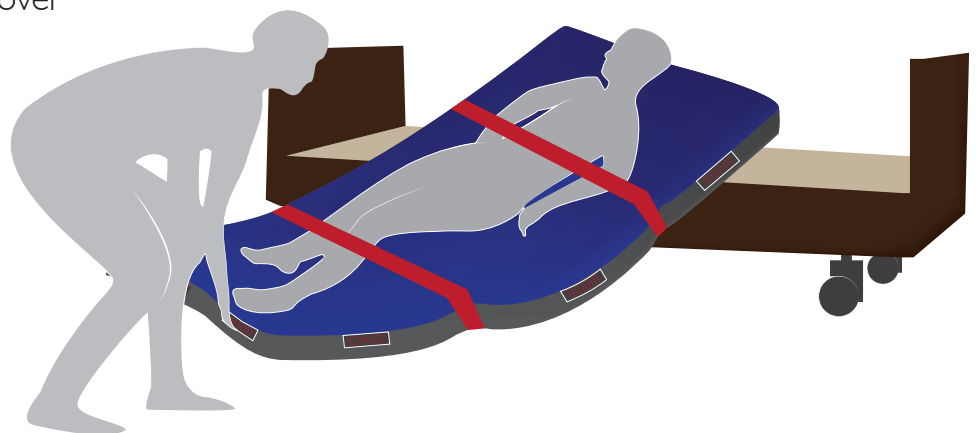

Evacuation systems such as stretchers and rescue sheets often require 2 or more persons to use them.

The EVAQ® decubitus therapy mattresses enable you to carry out evacuation gently using only one person, even via stairs!

§§ Quite apart from the fact that every facility operator is responsible for taking measures to ensure rapid evacuation! §§

SAFER → FASTER → GENTLER

- Safety belts with quick-release buckle
- Special sliding material at the bottom
- Stairway evacuation possible
- Firm edges provide stability
- Rescue handles on the cover

RESPONSIBLE CARE

ECOLAST® Foam

Medical quality meets environment protection 4.0

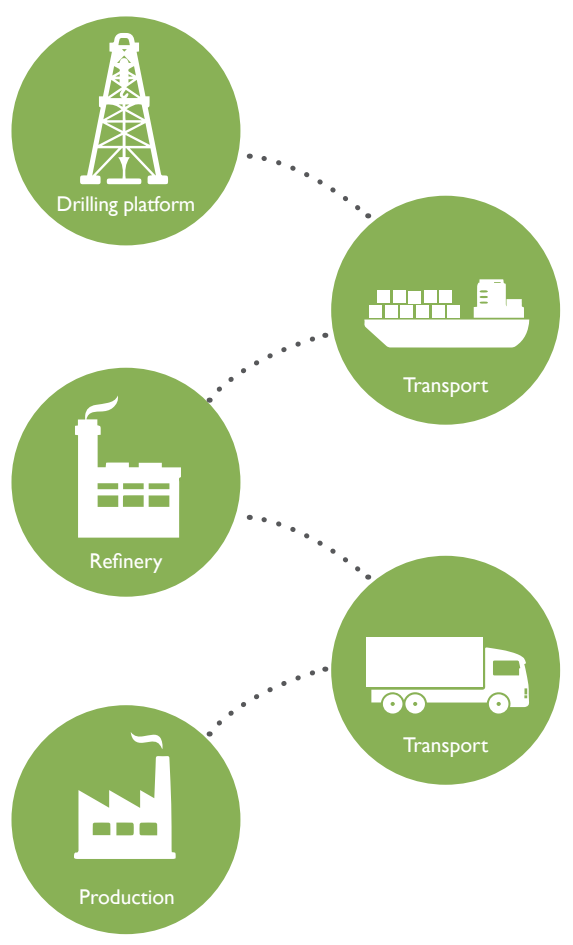

Make your contribution
to CLIMATE PROTECTION!

GREENLINE mattresses have a reduced CO₂ emission compared to conventional decubitus therapy mattresses (standard foam mattresses or alternating pressure mattresses).

*Source: Europur-Study 2015

Foam mattresses

1 kg foam = 3 kg CO₂

Conventional foam mattresses

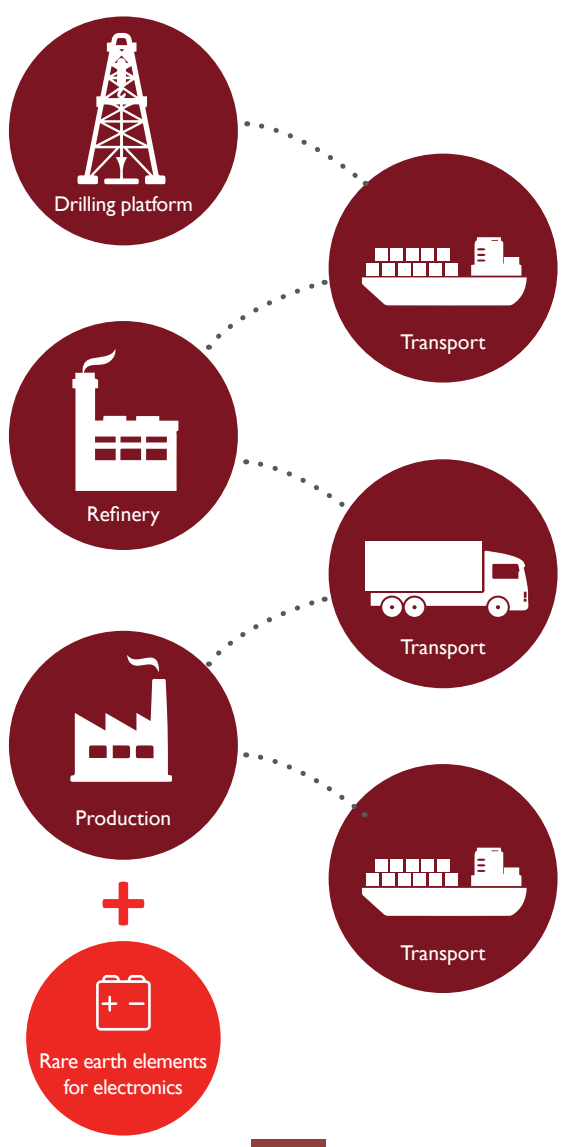

11 kg foam = 33 kg CO₂

— GREENLINE —

8,6 kg foam = 25,8 kg CO₂

Alternating pressure mattresses

1 kg plastic = 3,5 kg CO₂

10 kg plastic = 35 kg CO₂
+ rare earth elements
+ permanent energy consumption

ECOLAST® – Technical Advantages

GREENLINE mattresses are made of ECOLAST® foam. Compared to conventional decubitus therapy mattresses (*standard foam mattresses or alternating pressure mattresses*) they have less CO₂ emission.

ECOLAST® foam is a specially developed hybrid foam. Compared to standard foam, the more open-cell structure ensures improved air circulation, so that the patient benefits from an optimal microclimate.

ECOLAST® foam offers perfect pressure relief and an improved durability.

Hardness loss after exposure to humidity
(35 °C, 95% RH*¹)

CO₂ emission per m³ in kg*³

Capability emission figure*⁴

*¹ RH = relative humidity

*² RG = density (kg/m³)

hook-and-loop fastener

1

Lift the protective cover.

2

Open the valve by pulling the blue
lock and wait approx. 30 seconds,
until the air-cells have inflated
automatically.
(Valve lock can not fall off.)

3

Close the valve
by pressing.

4

Put the cushion on the wheelchair or seat.
(The handle must point to the front and the
attached arrows must point upwards.)
Sit on the cushion.

5

Carefully open the valve again
until the ideal sitting comfort
is achieved.

6

Close the valve and
the protective cover.

3-chamber seat cushion provides optimum pressure relief

Individually adjustable for ideal seating comfort

No pump or other tools necessary

Fast and easy adaptation to external pressure conditions

No risk of failure due to self-inflating FOAM-IN-CELL-TECHNOLOGY

Very light – 70 % less weight than conventional air-cell seat cushions

POSIMED®

Positioning aids

POSIMED® cushions are positioning aids in many different shapes and sizes for pressure sore prevention and treatment support.

With the various positioning aids the patient can be moved marginally and the well-balanced pressure distribution enables the patient to lie in a relaxed and pressure-relieving position.

The aim is to keep the duration and the intensity of pressure to a minimum.

Our positioning system is based on a pressure-relieving and malleable ball-shaped filling.

Positioning examples

30° lateral position

Heel protection

Semi-sitting position

135° lateral position
