

777 Creeping Bentgrass

BENEFITS

- Increased resistance to Poa annua
- Uniform turf with high putting quality
- Reduced inputs from fertiliser to pesticides
- Superior growth regulator performance

FEATURES

- Superior turf quality Highly competitive against Poa annua.
- Excellent winter colour with no purpling.
- Improved Dollar Spot, Brown Patch, resistance.
- Fine leaved texture, dark green colour.
- High turf density for better putting quality.
- Vigorous, uniform, moderately dense growth.
- Faster recovery from pitch marks.
- Great performance at all mowing heights.

SEEDING RATES

- 5 – 7.5gm Per square metre.
- 50 - 75kg Per Hectare

ESTABLISHMENT (under ideal conditions)

- Germination : 3 to 5 days
- First Mowing : 21 days after emergence
- First Limited use: 6 to 8 weeks

APPLICATION

- Golf Greens, Tees and Fairways,
- Sod production and Over seeding

CHARACTERISTICS

777 (Triple Seven) Creeping Bentgrass. (1HC and DLFPS-AP/3054 (*Agrostis stolonifera*) is the product of twenty years of research and development This variety has shown superior performance under stress and with wear. **777** produces a turf with attractive green colour, no purpling in cool weather, great heat resistance in summer and high disease resistance. **777** creeping bentgrass blends well with other leading bentgrass varieties. This variety is well adapted to all environments where creeping bentgrass can be grown. It can be planted straight or in blends for superior greens and tees.

USES

Recommended use for **777** creeping bentgrass is seeding golf course putting greens and tees on new construction or renovations. It can also be used for improving the performance of older, poor quality greens that need updating. It can be interseeded into Poa annua greens to reduce your inputs while maintaining the high density and excellent putting quality. It will tolerate the lower cutting heights utilized on many courses while maintaining high density and wear tolerance. Use on fairways will require low mowing heights and reduced fertility for superior performance. **777** can be combined with other improved creeping bentgrass varieties.

Increased resistance to Poa annua
