

EzyFoliar Enhance

7 - 0 - 3

plus 3% Fe & 10% Seaweed

EzyFoliar

BENEFITS

Easy foliar formulation which delivers natural, prolonged colour, with limited growth.

Increases chlorophyll, hence better photosynthesis.

Enhances seed germination plus root formation.

Great for reducing stress from mowing, disease pressure, heat, cold and drought.

Increases diseases tolerance.

Improves plant leaf quality and playing surfaces.

Supplies natural plant stimulants & surfactants to ensure maximum plant leaf absorption of nutrients.

Compatible with most high tech foliar fertilisers.

Delivers a unique combination of a full range of micro nutrients, amino acids and macro-nutrients for exceptional balanced feeding.

FEATURES

The naturally high Alginic acid content of the Lilei Seaweed reduces surface tension of the foliar spray and increases significantly the absorption rate of the nutrition compounds contained, with uptake occurring in two to three hours. In the soil the seaweed stimulate micro-organism due to its naturally high nutrition and stimulants resulting in increasing levels of soil organic matter.

FOR USE

Outstanding choice for golf greens, bowling greens, tees and, cricket wickets, croquet greens, tennis courts and low mowed fairways. Use EzyFoliar Enhance where instant colour, root mass development, outstanding turf performance and balanced plant nutrition is desired.

GUARANTEED ANALYSIS

Nitrogen (N)	7.0%
6% Urea	
1% Nitrate	
Available Phosphate (P)	0%
Soluble Potash (K)	3.0%
Sulphur (S)	1.7%
Magnesium	1.3%
Iron (Fe)	3.0%
Manganese (Mn)	0.3%
Zinc (Zn)	0.36%
Seaweed (Sargassum Algae)	10.0%
High levels of Cytokinins, Gibberellins, Auxins and 17 essential Amino Acids.	
Pack Size	20L or 200L

APPLICATION

	Rate per 100m ²	Rate per Hectares	Frequency
Golf Greens, Tees, Bowling Greens	180 - 260 mls	18 - 26 L	14 - 21 days
Fairway, Sports Grounds, Stadiums	200 - 260 mls	20 - 26L	As required

Delivers natural, prolonged colour, with limited growth
