

Rhizing Moon Turf Type Tall Fescue

BENEFITS

High rhizome number and aggressive tillering.
Shade tolerance plus high performance in full sun.
Superior disease resistance to Brown Patch, Leaf Spot and Pink Snow Mould.
Dense turf, fast recovery from wear by both rhizomes and tillering.
Uses: Ideal for golf course roughs, commercial turf, parks, sports fields and home lawns.

FEATURES

Performance under both low and high maintenance.
Fast recovery.
High wear tolerance.
Superior drought tolerance.
Very dark green, fine leafed, high density.
High levels of endophyte.

SEEDING RATES

35 - 50gm Per square metre.
350 - 500kg Per Hectare

ESTABLISHMENT (under ideal conditions)

Germination : 7 to 10 days
First Mowing : 3-4 weeks after emergence
First Limited use: 8-10 weeks

APPLICATION

Golf, fairways, surrounds and roughs. Lawns and Landscaping.

CHARACTERISTICS

Rhizing Moon (IS-TF 305 SEL) is a superior tall fescue whether for low maintenance, as it's A-LIST qualification shows, or high maintenance. In addition, it can recover from damage by both rhizomes and aggressive tillering. Under either low or high maintenance, **Rhizing Moon** demonstrates superior drought tolerance and recovery. **Rhizing Moon** is a very dark green, fine textured, high density tall fescue with superior performance from the North to the South and East to the West. It shows excellent shade tolerance and high performance in full sun. Superior Brown Patch, Leaf Spot and Pink Snow Mould resistance increases its low maintenance performance. High levels of endophyte provide resistance to surface feeding insects and contribute to stress tolerance

ADAPTATION AND USE

Rhizing Moon is recommended permanent turf on sports fields, lawns, parks and golf courses. It can be cut from ½" to 3" and still maintain density and performance. Full sun to shade **Rhizing Moon** shows high performance. It can be blended with Turf Rye and fine fescue and other turf species for superior turf. It is well adapted for all landscaping situations.

High rhizome numbers and aggressive tillering
