

Greenmaster Liquid Effect

6.9 Fe

BENEFITS

For use throughout growing season.
Very quick - green-up within 3 hours.
Provides true green-up from within the plant for long lasting results - lasts up to 6 weeks.
Hardens turf without excess growth.
Treat iron chlorosis.
No blackening from wheels or footmarks.
Can be used on acidic soils without further reducing pH
Can be used when black layer present.
Independent trials have shown that when used in an integrated approach with Sierraform GT and wetting agents disease levels are suppressed.
Ideal tank mix partner for boosting iron levels.

FEATURES

Greenmaster Liquid are premium liquid fertilizers with TMax technology for enhanced foliar and root nutrient uptake.

APPLICATION

Use at 10-30L per hectare in 600-1000L water per hectare. To optimise foliar uptake avoid high temperatures and sunny conditions. Avoid applications during frosty or drought conditions. At low water volumes (600 L/Ha) more of the nutrients are taken up by the foliage.

FOR USE

Very quick - green-up within 3 hours. Provides true green-up from within the plant for long lasting results - lasts up to 6 weeks. Hardens turf without excess growth. Treat iron chlorosis. No blackening from wheels or footmarks. Can be used on acidic soils without further reducing pH Can be used when black layer present.

GUARANTEED ANALYSIS

Iron total (Fe)	6.90%
Application Rate:	10 - 30 L/Ha (1-3 L/1000 m ²)
Water volume:	600 - 1000 L/Ha (60-100L/1000 m ²)
Coverage (10L):	3333 - 10000 m ²
Pack Size	10L
Specific Gravity	1.25
