

GREEN SPEED

0 - 0.9 - 4

With 7% Silica & 2% Humic Acid Potassium Silica Complex with Phosphite

BENEFITS

Strengthens turf blades.
Fast ball roll / Reduces ball marks.
Helps increase resistance to pests and diseases.
Improves heat and drought tolerance.
Better cut by greens mowers .
Humic acid to accelerate absorption.
Use before Tournaments.
Contains Phosphite to promote turf health and increase resistance to disease.
Humic Acid increase nutrient uptake.

FEATURES

Silica hardens the leaf and helps strengthen xylem vessels during times of high transpiration, thus reducing water loss. The Potassium phosphite helps promote plant health, increased disease tolerance as well as building carbohydrate reserves. The Humic Acid increase nutrient uptake through

the leaf and root tissue. For optimum results **Green Speed** can be tank mixed with **Essential Plus**

FOR USE

Golf greens, Cricket pitches, Outfields, Tees, Bowling greens, Lawns and ornamental grasses.

GUARANTEED ANALYSIS

Available Phosphate	0.9%
Soluble Potassium	4.0%
Derived from: Potassium carbonate. Potassium silicate, Potassium phosphite, potassium humate.	
Silica (SiO ₂)	7.0%
Humic acid	2.0%
Derived from Leonardite	
Pack Size	10 L or
Weight per litre	1.08 Kg

MIXING

Dilute at the rate of 1 to 100 in water if possible. Put half the water in the tank and add **Green Speed**. **Green Speed** is an alkaline material with a pH of 12 and should NOT be mixed with acidic or acid-producing chemicals. The following mixing procedures should be followed after **Green Speed** has been diluted with appropriate amounts of water. Add products to mix in this order:

- 1: wettable powders
- 2: flow-ables
- 3: water solubles
- 4: surfactants
- 5: emulsifiable concentrates

Be sure to agitate during each addition, Be sure each product is mixed well before adding the next. Apply all of the mixture in same day. Always use a jar test before mixing **Green Speed Si** with pesticides and fertilisers in your tank.

APPLICATION

Day to day use:	100ml / 100m ²	10L / Hectare Every 14-21 days
Tournament Preparation:	10L / Hectare	3-4 days prior to Tournament

Strengthens turf blades
Fast ball roll
Reduces ball marks
