

PRO-BALANCE

15 - 0 - 12

With 40% Slow Release Nitrogen

BENEFITS

Dual nutrient absorption through the leaves and roots.
True clear solution which requires no special mixing or agitation.

Equal Nitrogen / Potassium ratio, for balanced feeding and high quality turf.

Balanced nutrients, to enable use as a base for turf fertility programs.

40% slow release, methylene urea for prolonged feeding.

Can be safely mixed with a wide range of other fertilisers and chemicals including acidic and alkaline materials.

FEATURES

A high analysis, true liquid product with 40% controlled release nitrogen, in equal ratio with high grade, soluble, readily available potassium for optimum plant uptake.

FOR USE

Golf greens, Cricket pitches and outfields, Tees, Bowling Greens and Lawns. Fertiliser. Do not apply in slow drying conditions. Best to apply in spring and autumn during dormancy or before/after solid fert applications.

GUARANTEED ANALYSIS

Total Nitrogen (N) 15%
9.0% Urea N
6.0% Slowly available Water Soluble Nitrogen from Methylene Urea

Available Potassium 12%
Derived from: Potassium Carbonate

Pack Size 10 L or 110 L
Weight per litre 1.33 Kg

MIXING

Dilute Pro-Balance 15-0-12 with water first then add other products to mix in this order:

- 1: Wettable powders
- 2: Flow-ables
- 3: Water solubles
- 4: Surfactants
- 5: Emulsifiable concentrates

APPLICATION

Application	Rate per Hectare	Frequency
Tees and Greens	30 - 50 L	Every 14 - 21 days
Fairways	30 - 70 L	Every 30 days
Sports fields / sod	30 - 70 L	Every 30 days
Lawn Care	1.2L/100m ²	Every 6 - 8 weeks

A high analysis, true liquid product with
40% controlled release nitrogen
