SOLENOID VALVE, 4-WAY, 3-POSITION, DIRECT ACTING SPOOL

DESCRIPTION

This unit is a FOUR-WAY, THREE POSITION, cartridge type, spool type, direct acting, screw in type, solenoid operated, double coil, bidirectional closed center selector valve.

OPERATIONS

At the initial position, flow is totally restricted in all ports.

When the upper solenoid coil is energized, the spool in this valve is shifted and allows flow between ports 2 and 1 and ports 3 and 4.

When the lower solenoid coil is energized, the spool in this valve is shifted and allows flow between ports 3 and 2 and ports 4 and 1.

FEATURES AND BENEFITS

Continuous-duty, very low heat rise & waterproof solenoid coils.

Interchangeable solenoid coils & terminations options available.

Hardened precision fitted spool & sleeve provides reliable, long life.

Very efficient, wet-armature solenoid core tube construction.

All external carbon steel parts are plated for longer life against the elements.

All cartridge valves are 100% functionally tested.

Industry common cavity.
