Features

- Next generation sealing tabs
- Seal allows for a leak resistant closure of the container
- One piece, hinged construction
- Increased container rigidity to allow finished product stacking
- Provides an excellent water vapour barrier for longer shelf life

Why switch to recycled PET?

- Show commitment:
Demonstrate to customers you really are committed to corporate social responsibility and the environment.
- Consumer preference:
Research shows that consumers display a preference for brands and retailers that use recycled content in their packaging. Recycling plastic content can help to build brand loyalty and change perceptions.
- Maintain quality:
Packaging products in recycled materials is possible without compromising performance, physical properties, storage stability or visual appeal.
