

Much more than just a bench, the EASYBENCH 1 is an essential part of your workshop. Comprising a lifting table reaching 1.60 m, and a 5-tonne capacity pulling arm, it serves as an invaluable daily accessory for any workshop environment, ensuring you can work at the right height, and carry out any collision repairs. This robust, yet quick and easy-to-use system, offers versatility and productivity. **The compact design will save you valuable workspace.**

- Lifting capacity: **2.5 tonnes.**
- Pulling force: **5 tonnes.**
- Very compact: 11 cm from the floor when in the lowest position.
- Complete solution: Reduces unnecessary moving around: **lifting and straightening using the same product.**
- **Powered by:** 400 V hydraulic unit with remote control (10 m).

The bracket pivots through 180° and can be fitted together to perform vertical, horizontal or angular pulls with great precision. The return pulley completes the system allowing downward pulls without having to reposition the unit.

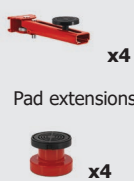

Supplied with:

Hydraulic unit (3x400V)

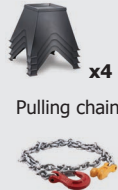

Lifting arm

Pump and hose (2.5 m)

40 cm stands

Supports and pulling clamps

Side pulling support
