PACE™ MEDIUM CUT COMPOUND (1332)

DESCRIPTION

PACE™ Medium Cut Compound is specially formulated for use with orbital polishers. It is a correcting and polishing compound that removes up to P2500 sand scratches and polishes to a deep gloss in one step, reducing cycle times. It contains no waxes, fillers or silicones making it 100% body shop safe. It is water-based and easy to use, significantly reducing clean-up time.

DIRECTIONS

Shake well before using. For best results, use with the PACE™ Orange Foam Medium Cut Pad (#890195). To ensure maximum performance and dust-free working, the pad should be seasoned. Surface should be clean, cool and dry.

- Apply four, 1/4" (6.25mm) drops of PACE Medium Cut Compound to the pad and spread on surface using your orbital polisher set to the 1 or low setting.
- Once the area is covered, turn orbital polisher up to the 6 or high setting and with light to medium pressure work the compound from opaque to clear to ensure you have broken down the abrasives and have brought the surface to a deep gloss.
- Do not buff to a dry surface.
- PACE Medium Cut Compound is designed to stay wet throughout the entire polishing process to achieve a swirl-free finish.
- Wipe surface with a clean ultra-soft microfiber cloth.
- Follow with PACE™ Ultimate Polish (#1333) if an ultra-deep gloss is desired.

PRODUCT FAQs

Q1: When should I use PACE™ Medium Cut Compound?

A1: PACE Medium Cut Compound removes up to P2500 sand scratches and polishes to a deep gloss in one step, reducing cycle times.

Q2: What type of pad should I use with the PACE Medium Cut Compound?

A2: We recommend the PACE™ Orange Foam Medium Cut Pad in either the 6.5" (#890195) or 5.5" (#890191) size.

Q3: How easy is the PACE Medium Cut Compound to use?

A3: Extremely. The compound has a long working window that can handle P2500 sand scratches.

Q4: What if I want a very deep gloss like a show vehicle?

A4: PACE Medium Cut Compound will leave a nice gloss. However, for an ultra-deep gloss, apply PACE™ Ultimate Polish.

Q5: Is PACE Medium Cut Compound body-shop safe?

A5: Yes, PACE Medium Cut Compound contains no waxes, fillers or silicones making it 100% body shop safe.
