PACE™ ULTIMATE POLISH (1333)

DESCRIPTION

PACE™ Ultimate Polish is specially formulated for use with orbital polishers. It is a finishing polish to be used as a final step after using PACE™ Heavy Cut Compound (#1331) or PACE™ Medium Cut Compound (#1332) to achieve a deep, show-car-level gloss. PACE Ultimate Polish can also be used as a one-step finish for enhancing the appearance of a vehicle where light correction with a deep gloss is desired. It contains no waxes, fillers or silicones making it 100% body shop safe. It is water-based and easy to use, significantly reducing clean-up time.

DIRECTIONS

Shake well before using. For best results, use with the PACE™ Black Foam Ultimate Polish pad (#890196). To ensure maximum performance and dust-free working, the pad should be seasoned. Surface should be clean, cool and dry.

- Apply four, 1/4" (6.25mm) drops of PACE Ultimate Polish to the pad and spread on surface using your orbital polisher set to the 1 or low setting.
- Once the area is covered, turn orbital polisher up to the 3 or medium setting and with light to no pressure work the product from opaque to clear to ensure you have broken down the abrasives and brought the surface to a deep gloss.
- Do not buff to a dry surface.
- PACE Ultimate Polish is designed to stay wet throughout the entire polishing process to achieve a swirl-free finish.
- Wipe surface with a clean ultra-soft microfiber cloth.

PRODUCT FAQs

Q1: When should I use PACE™ Ultimate Polish?

A1: PACE Ultimate Polish can also be used as a one-step finish for enhancing the appearance of a vehicle where light correction with a deep gloss is desired. It can also be used as a final step after using PACE™ Heavy Cut Compound (#1331) or PACE™ Medium Cut Compound (#1332) to achieve a deep, show-car-level gloss.

Q2: What type of pad should I use with the PACE Ultimate Polish?

A2: We recommend the PACE™ Black Foam Ultimate Polish Pad in either the 6.5" (#890196) or 5.5" (#890192) size.

Q3: Should I buff to a dry surface?

A3: No, PACE Ultimate Polish is designed to stay wet throughout the entire polishing process to achieve a swirl-free finish.

Q4: How many passes are typical?

A4: Three passes with PACE Ultimate Polish is normally sufficient. You do not want to buff to a dry surface.

Q5: Is PACE Ultimate Polish body-shop safe?

A5: Yes, PACE Ultimate Polish contains no waxes, fillers or silicones making it 100% body shop safe.
