If you would like the opportunity to improve the operation of your Bodyshop, baslac 45 now offers you the complete package to help you achieve these goals.

Better colour. Better products. Better savings.

baslac® refinishing solutions now include a Waterborne Basecoat.

With over 70% of vehicle manufacturers now using water solutions, adopting water technology is the next logical step for the refinishing industry, making colours & effects much quicker & easier to replicate.

With this in mind, baslac 45 Waterborne Basecoat has been designed to be one of the most user-friendly waterborne systems on the market. Using standard application processes, blending is easy, spraying and leveling behaviour is excellent not to mention it releases significantly less emissions into the atmosphere which

adds to a healthier working environment for not only your staff but your community as well.

As with all things baslac, making the change from solvent to water is easy as... BASF's proven conversion processes will ensure a successful transition to water. baslac 45 now completes the baslac line-up, from Undercoats through to Topcoats, Basecoats and Clearcoats, baslac continues to offer class leading solutions for Bodyshops.

baslac Undercoats

A good job starts with good preparation and the baslac Undercoat range follows this principle by allowing you to create the perfect base to complement any of the baslac Topcoats or Basecoats.

baslac Topcoats

baslac Topcoats are designed with performance in mind. A high solid, pigment system allows for good flow and covering power with a quick drying finish whilst providing excellent hardness and polishing properties on drying. Colour matching is accurate and a comprehensive range of colour support tools to make the process even easier.

baslac Basecoat & Clearcoats

baslac Basecoats offer the perfect solution for all solid, metallic and pearl colours. They are simple to apply and are accompanied by excellent colour matching support. baslac Basecoats have excellent hiding powers and mottle control to ensure the best possible finish for your job.

baslac Clearcoats offer all the key performance properties you need to achieve the ultimate finish. Featuring excellent durability, high gloss retention and good levelling properties, the baslac Clearcoat system offers an easy to use, quality system.

Fast Finder

The Fast Finder provides a comprehensive visual colour identification tool containing references to all car manufacturers. The colour swatches within the system are sprayed with original refinish paint to ensure accurate colour representation. The Fast Finder swatches are updated yearly and housed in a clear modular case for fast colour identification, referenced via the Formula Finder colour retrieval software.

Formula Finder

The baslac Formula Finder colour retrieval software allows for fast and easy access to more than 60,000 mixing formulas. Just fill in the relevant fields in the clearly structured user interface, and the requested mixing formula will instantly appear on the screen.

Australian Colours

The Australian Colour Finder decks are housed in a stand-alone modular cabinet containing all the Australian local manufacturers and are sprayed with original refinish paint, with the added advantage of a standard, and the two most popular, colour variants.

Mixing Machine

An advanced can-fixed system utilising cone-gearing for stable running and extremely low noise levels. The baslac advanced mixing machine has been designed to give you years of trouble-free service.

Tinting Chart

An easy to use wall chart which represents the baslac 30 Topcoat and baslac 45 Basecoat mixing bases with their tonal characteristics.

Internet Formula Finder

baslac offers an up-to-date and comprehensive web based colour information tool which allows access to a global colour database. It is frequently updated and contains flexible search options for quick and easy colour sourcing.
