

BUMPERS

FENDERS / ARCHES

TAILGATES

BONNETS

DOORS

WINGS

With the EasyFlex you can paint a whole panel or bumper at any angle without ever having to put down your gun. Its patented one handed turning and locking mechanism, strong low profile frame and mounting points, give you excellent access to both sides of the panel or bumper without the need to remove it from the stand.

Unless your body shop processes a high proportion of larger or unusually shaped bumpers, there is no need to buy specialized stands for painting car doors, hoods, fenders or bumpers, the EasyFlex takes them all.

 360° Rotation

 One-Handed Turning / Locking

 Holds up to 100kg or 220lbs

 Folds Flat

 Extends: Up/Down Left & Right

 Rubber Wheels

 Low Profile Mounting Points

 Modular Design & Customisation

 Superfast Setup
