

DESCRIPTION:

Pacer® Ultra Cut Scratch & Scuff is formulated to clean up paint oxidation (fading/ cloudy colour) and to remove scuffs and most fine through to coarse scratches. It produces an outstanding gloss on all automotive coatings. It also restores gloss to marine coatings and gel coat.

DIRECTIONS:

Shake well before use. Dispense onto a cloth or applicator pad. Start and finish, one section at a time. Use small amounts and rub in a circular motion. Allow to touch-dry. Wipe (buff) off residue with a soft towel. For best results follow up with a wax.

APPLICATIONS:

Removes oxidation scuff marks and scratches on paintwork

PROPERTIES:

Cream to light yellow cream with vanilla odour and a pH of 8.7

Available Sizes:

250 gm

ULT025

WARNING

Hand Compound

OUR VISION AND MISSION

To be the leading value-based provider to the market. We have a dedicated team to achieve excellence for our customers and a philosophy of total quality. We conduct business and create relationships in an ethical and sustainable manner with customers, our community and the environment. The value we provide our customers is the opportunity to increase profit through lower cost solutions that do not sacrifice quality or service.

ENVIRONMENTAL POLICY

Pacer is committed to leading the industry in minimising the impact of its activities on the environment. The key points of our strategy to achieve this are: Purpose built premises utilising energy efficient technology and rain water collection. Actively promoting recycling both internally and amongst our customers and suppliers. To develop and promote a product range to minimise the environmental impact of our products. We are constantly evaluating and looking at substituting to a more environmentally friendly composition of raw materials for our products. To meet or exceed all the environmental legislation that relates to our industry.

DISCLAIMER

The technical data and information provided, including the recommendations for applying & using our products, is given in good faith based on our current knowledge and experience and is believed to be accurate when applied under 'normal' conditions. In practice, the materials, surfaces or conditions are so varied that no warranty regarding the working results or any liability or guarantee can be inferred either from this information nor from a verbal consultation. It is recommended that the user makes his or her own tests to determine the suitability of the product for their own requirements.
