

Clax® Revoflow Oxi 4XP3

Highly concentrated Oxygen Bleach

Clax Revoflow Oxi 4XP3 is a highly concentrated medium temperature activated bleach for fabric washing.

Key Properties

Clax Revoflow Oxi 4XP3 is a highly concentrated activated powder oxygen bleach. This product is ideal to reach high bleaching performance at medium temperatures (40°C - 60°C) and higher. This will result in cost savings due to the advantage of washing at lower temperatures. The product is intended to be used in conjunction with other Clax Revoflow products in cases of special problems arising with bleach performance. At 40°C with sufficient dosing level, Clax Revoflow Oxi 4XP3 can also be used for chemo thermal sanitising of the washing linen.

Clax Revoflow Oxi 4XP3 at low dosage can also be used in final rinse to neutralise residual chlorine when using a chlorine bleach such as Clax Revoflow Clor 4XP1 in the main wash.

Benefits

- ▶ Effective bleaching at low to medium temperatures
- ▶ Reduced environmental impact
- ▶ Safe small encapsulated packaging

Designed For

- ▶ Healthcare
 - ▶ Lodging
 - ▶ Government
-

Use Overview

Directions for Use

1. Dose using Clax Revoflow dosing system.
2. Dose into main wash at temperature between 40-60°C
3. For neutralising residual chlorine levels if chlorine bleach has been used in the main wash. Dose at 0.1-0.2g/kg dry goods.

Contact your Diversey representative for procedures to optimise performance.
