RINSE PLUS

RINSE AID FOR MACHINE DISHWASHING

DESCRIPTION

RINSE PLUS is a drying agent which when added to the final rinse water of glass or dish washing machines, by means of a specially designed feeder, dramatically reduces drying time of washed articles. RINSE PLUS also markedly improves the finished appearance of crockery, glassware and cutlery by eliminating water spotting.

APPLICATION

RINSE PLUS is a pink moderately viscous liquid and contains ingredients which, when mixed with water at 60-90°C rapidly lowers the surface tension of water and prevents water from forming droplets on a surface. This product is equally effective in both soft and hard water as it contains a water softener and antiscaling agents. RINSE PLUS eliminates the need for manual toweling of washed articles, thus reducing the possibility of spreading pathogenic organisms due to this method of drying. RINSE PLUS is safe on all metals normally found in the construction of dish washing and glass washing machines.

BENEFITS

- ◆ Effective in hard or soft water.
- ◆ Safe on metals and plastic-ware.
- ◆ Contains an antiscaling agent.
- ◆ Eliminates spotting and streaking.
- ◆ Economical to use.
- ◆ Colour coded for safety and identification.

DIRECTIONS FOR USE

RINSE PLUS is injected into the final rinse water on all machines by the use of highly specialised electronic dosing equipment that injects the correct amount of product each time the rinse cycle is activated. The results obtained with RINSE PLUS are influenced by several factors, these being temperature of the final rinse water, efficiency of the dish washer rinse, residual heat held by the article being washed and the quantity of RINSE PLUS used.

HEALTH & SAFETY INFORMATION: See separate MSDS available on request.

PACKAGING: ◆ 5 litre Polyethylene drum ◆ 15 litre Polyethylene drum

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
