 Address: Unit 1, 7-9 Brough Street, Springvale, 3171, Vic

## **What's innovative about the 'No Rinse Floor Cleaner'?**

### ***Multi Function Enzyme***

#### **The Benefits of Adding a Multi-Enzyme Solution:**

- A more sustainable cleaner. Enzymes are readily biodegradable.
- Support for the “compaction” trend. Low volumes of enzymes are required to replace high-volume ingredients such as surfactants and builders.
- Improved performance. The synergistic effect of combining several enzymes results in improved stain removal and overall floor cleaning beyond what single enzymes and traditional surfactants can achieve.
- Energy-efficient product. Enzymes work well even at low temperatures, allowing wash temperature reductions and thereby energy savings.

#### **What is the Safer Choice label?**

Finding products that are safer for you, your family, and the environment should be easy—that's why EPA created the Safer Choice label. The Safer Choice label helps you identify products with safer chemical ingredients, without sacrificing quality or performance. When you see a product with the Safer Choice label, it means that EPA scientists have evaluated every ingredient in the product. Only the safest ingredients are allowed in products with the Safer Choice label.
