 Address: Unit 1, 7-9 Brough Street, Springvale, 3171, Vic

FOR ALL INDOOR & OUTDOOR URINE PROBLEMS

- all-in-one urine remover that does the job on all urine - cat urine, dog urine and human urine.

All urine consists of urea and uric acid crystals. Some general cleaners can remove the water-soluble components of urine (urea) but leave behind the non-soluble uric acid crystals that retain the odour and stain. These crystals attach to surfaces and are very difficult to dislodge. Any humidity or dampness will trigger the dormant crystals bringing back the odour.

- enzymatic formula “breaks down” the uric acid crystals while removing the urea components, eliminating both the urine stain AND the odour for good.

- contains no harsh or hazardous ingredients, is biodegradable and environmentally friendly and is **safe to use around humans and animals.**
