[Enzyme Wizard Urinal Spray and Go](#) - all-in-one urine odour remover that leaves a pleasant Eucalyptus fragrance behind. All urine consists of urea and uric acid crystals. Some general cleaners can remove the water-soluble components of urine (urea) but leave behind the non-soluble uric acid crystals that retain the odour and stain. These crystals attach to surfaces and are very difficult to dislodge. Any humidity or dampness will trigger the dormant crystals creating odour. [Enzyme Wizard Urinal Spray and Go's](#) enzymatic formula "breaks down" and penetrates the uric acid crystals where it removes the urea components, eliminating both the urine stain AND the odour for good.

- contains no harsh or hazardous ingredients, is biodegradable and environmentally friendly and is **safe to use around humans and animals.**
