

Q-Tech Shield Helmets

Choosing the Right Helmet:

When it comes to safety, it's important to pick the right gear for the job. Our Climbing and Rescue helmets feature a polystyrene liner designed to protect from multiple impacts, whereas our Industrial Safety helmets are built with a cradle liner designed to absorb shock. Due to the inherent differences between these two systems, it is impossible to manufacture a single helmet that meets both standards. Do not be misled by manufacturers who claim their helmets meet both standards.

Product Features:

- Strong, light ABS plastic shell.
- Low-profile slots for clip-on hearing protection.
- Multiple clips hold head torch strap in place. (Torch not included.)
- Venting system allows a continuous flow of air across the head to keep the wearer cool and comfortable, while maintaining impact protection.
- Three-way adjustable nylon chin strap with robust, off-set clip.
- Headband ratchet wheel makes adjustment easy for a wide range of head sizes.

Available Colours: (Note: Red only available as Industrial Safety Helmet)

Quick and easy headband adjustment to fit a wide range of head sizes

Multiple clips hold your head torch strap in place

Low-profile slots for clip-on hearing protection

Vent system provides natural airflow, keeping you cool and protected

Vented Climbing and Rescue Helmet
