

UPS-2000LI

Powerful 2000VA/1200W Line-Interactive UPS with high-capacity 9Ah dual batteries. Ideal for supporting larger workstations and server setups with simulated sinewave output.

Engineered for robust power backup, the UPS-2000LI delivers 2000VA (1200W) of capacity to handle demanding electronic loads. This Line-Interactive system utilizes dual 12V/9Ah batteries to provide extended runtime during power failures. It features a sophisticated LCD interface providing real-time data on input/output voltage, battery levels, and fault indicators. The system includes "Full Protection" technology, shielding your hardware from short circuits and over-discharge. Its simulated sinewave output and wide operating voltage range (140-300Vac) make it a versatile solution for unstable power environments.
