

EM COVER- WP

TROJAN
DEVELOPMENTS

Installation Guidelines for the Em Cover - WP (Emergency Request to Exit)

The Weather Protected Em Cover has the same installation requirements as the standard Em Cover.

The additional weather protection features consist of a protective coating applied to the PCB, all apertures sealed and an EVA gasket fitted. This offers the ultimate protection against water and dust ingress in harsh environments.

Installation Wiring Diagram

The Em Cover - WP has a five way plug lead for connection as follows:

- Red: Power supply connection +10 to 30Vdc
- Black: Negative power supply connection
- Blue: Connection to the Em Rex / Smart Em Rex Cover Input
- Yellow & White: Normally closed contacts for connection to the Access Control Systems for monitoring.
The output is rated at 200mA @ 30Vdc.

Wiring diagram showing the connections to the Em Rex / Smart Em Rex.
