EFPR819

DESIGNED TO PROTECT FORCE 360

Eyefit

CLEAR LENS

Features

- Certified medium impact rated protection to AS/NZS 1337.1:2010
- Diamond Tech Hardcoat provides extreme scratch resistance and resists acid and solvent degradation
- HydroTech AF is a washable hydrophilic based coating providing an anti-static finish that repels dusts and particles and prevents fog forming on the lens, the ideal coating for hot and humid conditions
- Base 8 curve provides excellent optical clarity and an extended wrap for increased side protection
- The Force360 patented FitAll Sidearm system is designed to gently hug all head shapes. A world first product that ensures extreme comfort for every wearer. The FitAll Sidearms hugging design ensures that the safety spectacles never slip or move, making them the most secure and comfortable spectacle in the marketplace today
- The nose bridge is the apex point for eyewear comfort. Force360 utilizes Flex Bridge technology, the softest shape memory material that flexes and moulds to shape, for all day comfort
- UV400 Polycarbonate lenses offer the wearer the best protection against UVA and UVB damaging rays
- The unique design of the floating lens means airflow is maximized behind the lens and fogging is minimized. The best design for highly humid and hot environments
- Durable and resilient polycarbonate lens and sidearm build

Standards & Certification

Force360 recognise that without product certification by a Notified Body all product performance testing, and adherence to standards claims cannot be independently verified.
If they are not as claimed, serious safety implications for the wearer, and legal implications for the supplier and even the employer may arise.
Force360 source their entire range of FPR eye protection from a single manufacturing partner to ensure consistency and reliability of product, but most importantly Force360 have taken the further step of engaging a globally recognised Notified Body to audit and certify both the manufacturing process and the products.
All of Force360's eye protection is certified to the latest AS/NZS eye protection standards.

Certified Product™

Key Technologies

Medium Impact
Certified medium impact rated protection to AS/NZS 1337.1:2010.

Diamond Tech HardCoat
Force360 uses its own Diamond Tech Hardcoat on all FPR lenses. Diamond Tech Hardcoat is extremely scratch resistant and resists acid and solvent degradation as well as scratches from dusts and debris.

HydroTech AF
Force360 uses its HydroTech Anti Fog coating on most FPR safety lenses. HydroTech AF is a washable hydrophilic based coating providing an anti static finish that repels dusts and particles and prevents fog forming on the lens, the ideal coating for hot and humid conditions.

Fit All
The Force360 patented FitAll Sidearm system is designed to gently hug all head shapes. A world first product that ensures extreme comfort for every wearer. FitAll Sidearms hugging design ensures the spectacles never slip or move, making them the most secure and comfortable spectacle in the market.

Floating Lens
The unique design of the floating lens means airflow is maximized behind the lens and fogging is minimized. The best design for highly humid and hot environments.

Flexbridge
The nose bridge is the apex point for eyewear comfort. Force360 utilizes Flex Bridge technology, the softest shape memory material that flexes and moulds to shape, for all day comfort

UV400
UV400 Polycarbonate lenses offer the wearer the best protection against UVA and UVB damaging rays. 100% protection is the standard across the entire Force360 FPR eyewear range.

Radiation Guide

UVA/UVB 280-380nm	UV light rays from the sun are invisible to the eye yet can cause serious damage including corneal blistering, cataracts, premature aging, conjunctivitis and partial blindness
Visible Light 380-780nm	Intense visual bright light can cause retina damage and create visual perception issues
Blue Light 380-500nm	Blue light rays from the sun or artificial lighting like neons, cause eye strain and fatigue. Colours and definition can be adversely affected. In extreme cases blindness can occur
Infra Red Light 780-1400nm	Infra Red rays from the sun or mechanically heat generating applications like gas welding can cause eye dryness and corneal damage, macular degeneration and blindness
