## Insurance Coverage - Certifications

The sums mentioned are minimum insurance values. We recommend that you determine the most favorable rating by talking to your insurance company.

Many of the amounts can be increased if the safe is monitored by a burglar alarm system

\* Because of different insurance conditions coordination with the insurer is required.

You may achieve a correspondingly higher insurance cover when you get advice from your insurer.

All safes with a mass of less than 1,000 kg are equipped with an anchoring device and must be anchored in accordance with the assembly instructions Each ECB / VdS-approved safe is supplied with operating and assembly instructions enclosed.

The VdS tests and certifies products on the subject of security. BURG-WÄCHTER Safe locks SecuSafe and SecuTronic achieve high resistance values in the tested lock classes. The VdS seal of approval stands for quality and reliability.

Many BURG-WÄCHTER safes meet these Requirements of the European standards EN 1143-1 and / or EN 1047-1. This is done in the ECB · S certificates of the European Certification Board · Security Systems (certification body according to EN 45011). The ECB · S certification includes an unannounced test of the production Locations. This is a constant Quality level guaranteed.

Safes with this symbol meet the technical specifications of the standard sheet 24992, as of May 1995. BURG-WÄCHTER is a member of the trade association FV security systems in the VDMA, Frankfurt.

This label says: Put through its paces in the BURG-WÄCHTER test laboratory. So that you get reliable quality even with inexpensive safes.

These safes are characterized by a particularly high level of fire protection.
