## Remote Programming Steps

### Programming New Remote

#### Mongoose MRC80

##### To program new remotes to M80 models:

1. Ensure system is disarmed, use either spare remote or override.
2. Open the driver's side door and leave open during the procedure
3. Insert key into the ignition and turn from 'ON' to 'OFF' 3 times.  
A siren will chirp if successful.
4. Press 'ARM' button on existing remote (siren chirps)
5. Press 'ARM' button on the new remote (siren chirps)
6. Repeat for any other remotes
7. After programming the remotes, wait 10 seconds for learning process to complete.

##### To program new remotes to MX750

1. Ensure system is disarmed, use either spare remote or override.
2. Insert key into the ignition and turn to 'ON' and press the 'OVERRIDE' button 4 times and hold down on 4th press (siren chirps after 3rd press)
3. Press 'ARM' button on existing remote (siren chirps)
4. Press 'ARM' button on the new remote (siren chirps)
5. Repeat for any other remotes
6. Release the 'OVERRIDE' button and turn ignition OFF
