Remote Programming Steps

Note: These are instructions for adding additional Remote Control Transmitters (with at least one functional Remote Control Transmitter.)

1. Insert valid programmed remote control into the remote reader (glove box). The vehicle security indicator will illuminate continually for 5 seconds.

During this period do the following:

2. Remove the programmed remote control from the reader
3. Insert new remote into the reader
4. Remove newly programmed remote control from the reader
5. Test the newly programmed remote control
6. If the newly programmed remote control does not work, arm and disarm the system with the original remote control and try programming the new remote control again.
