

How do you make great even better?

SignLab v10 includes dozens of new features that focus on productivity, design and connectivity enhancements. Here are some of the highlights.

New Features

The latest technology

64 bit speed. It's your choice, install SignLab v10 in 32 or 64 bit mode. 64 will enhance your file processing times as well as the speed that all design functions take.

Go lightning fast with SignLab v10 in 64 bit!

The latest Windows™ support. Upgrade your computers operating system to the latest and greatest. SignLab v10 supports Windows™ 10, 8 and 7.

Enhanced workflow

Customized workspace options. Save docked palettes, choose from 4 tool set icon options and much more provide a completely unique workspace configuration just for you.

Instant access clipart viewer.

New, streamlined clipart viewing with direct access to specific online clipart libraries. 1,000,000's of pieces of clipart at your disposal.

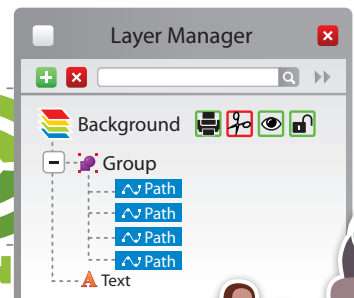

The leader in productivity and accessibility

Unicode support. Industry standard character script support provides the ability to create designs in all languages and functionality within Windows™ installations of all languages as well.

Intuitive layer view display.

Easily arrange and manage complex design elements into layers for simple editing of each.

Bezier object support.

Create and edit objects in Bezier mode.

True shape nesting.

Maximize media savings for all print and cut jobs using SignLab's automated "smart nesting" feature of all contour cut, clipped objects.

Updated Pantone™ color matching libraries.

Includes all of the latest Pantone color-set palettes.

Unmatched file format

compatibility. Import .pdf, .svg and all other widely used file formats for seamless workflow with files originating from other applications – including competitive sign making software packages.

Spectacular design and special effects

Special effects tools. New CADlink special effects filters and shadow effects.

Optimized font collection management. Fonts now categorized in easy to manage groups.

Decorative cut patterns. New slice tools provide simple options to subdivide shapes as well as to create attractively designed decorative cut patterns.

More text control capability. Enhanced point size, character white space, wrap text to custom text frames.
