Dangerous Goods Transport Costs

Due to recent cost increases for shipments containing Dangerous Goods (DG's), Science Supply Australia has had to review the DG surcharges to be passed on to customer as listed below.

Interstate shipments (NSW, ACT, QLD, SA, WA & NT)

The DG Surcharge for interstate deliveries has increased from \$20.00 + GST to \$25.00 + GST. This is purely to cover the costs charged to SSA by the transport companies themselves. Fuel surcharges are currently being fully absorbed by SSA in order to keep delivery charges manageable for our customers. The DG surcharge only applies to shipments containing Dangerous Goods so does not apply to shipments that do not contain DG's.

Shipments to VIC and TAS

At present, the DG surcharge for VIC and TAS remains at \$10 + GST due to the shipments being handled by different transport companies.

The above changes will take effect from January 1st, 2024.

The standard delivery charges will remain unchanged for 2024.

** any large volume or large value orders will still be handled separately.*

Please don't hesitate to contact us via email – sales@ssapl.com.au – or via phone – 03 9873 2588 – if you have any queries or concerns.

Yours sincerely,

Managing Director
