

BC CRETEWASH

Acid Detergent

BC CRETEWASH is an acidic detergent formulated to thoroughly clean transport vehicles and equipment used in the concrete industry.

BC CRETEWASH cleans off even heavy encrustations of concrete and is an excellent aid to the building industry.

How to Use

Concrete Transportation & Handling Equipment	Dilute one part BC CRETEWASH to 10-15 parts cold water and apply to soiled surfaces with a plastic bristled brush or broom. Allow 5-10 minutes before rinsing with clean water. For heavy encrusted equipment a stronger dilution is recommended.
Building Industry	To remove excess concrete from brickwork and cement rendering dilute one part BC CRETEWASH to 15 parts cold water. Apply as above and hose off. BC CRETEWASH may be applied a second time to remove deposits not dislodged in the first application.

Features	Advantages	Benefits
Fast acting	Labour Saving	Economical
Rust Inhibitor	Protects all Metal surfaces	Prolongs Equipment Life
Concentrated	High Dilution Rates	Economical

Specifications

Appearance	Red liquid
Odour	Complete
Hard Water Tolerance	Excellent
Rinsability	Complete
Flammability	Non-flammable
