

SURE SHIELD HAND SANITISER

ENRICHED WITH GLYCERINE

HAND SANITISER

Suitable for
use in
underground
mines as non-
flammable

Sure Shield is an alcohol-free hand sanitiser liquid. It dries without leaving your hands greasy. Contains moisturisers to help leave your hands soft, refreshed, and hygienically clean. Remains active for longer on skin than alcohol gels.

FEATURES

- ✓ Alcohol free – Does not dry your hands and cause cracking and skin damage
- ✓ Non-flammable – Safe
- ✓ Keeps active longer – Less application of product
- ✓ Safe – Both to end user and the environment

SPECIFICATION

- Alcohol free – Does not dry your hands and cause cracking and skin damage and low vapour kind to sensitive noses
- Low pH – Matches the natural condition of your skin
- Enriched with glycerine – Replenishes the natural oils removed during sanitising process
- Non-flammable – Safe
- Biodegradable – Good for the environment

DIRECTIONS FOR USE

Dispense a small amount onto hands, approximately 2 to 3 mm. Rub thoroughly over all surfaces of both hands. Do not rinse. Rub hands together briskly until dry.

For best results, decant from the 5L bulk pack into the bottle and foamer.

SURE SHIELD HAND SANITISER TEST RESULTS

A STATEMENT FROM THE MANUFACTURER

In these unprecedented times, the regulations around testing hand sanitiser products have been relaxed. However, we understand the concerns of you, the community, regarding the possibility that some products being rushed to market, including an influx of imported products, might not be reliable.

We value your trust in us, and while we knew our new Sure Shield Hand Sanitiser was effective and satisfied the requirements of the TGA standards for sanitisation, your peace of mind in these trying times is important to us, so we went the extra mile and had our product independently lab tested to verify its credentials.

As expected, the results confirmed it kills 99.999 – 99.9999% of the germs required for it to be effective for hand sanitisation within ONE MINUTE, passing the standard kill test with flying colours!

Here's how Sure Shield works:

Quaternary Ammonium Compound (QAC) has been used for decades in hospitals for its antimicrobial and disinfectant properties and is widely acknowledged as a perfectly acceptable alternative to alcohol.

Our amazing in-house chemist, who has formulated for most of the big companies throughout his career, has had this great product in the pipeline for 12 months, so we haven't made it up overnight! Want more proof QAC works? In her March 13 article, *How we know disinfectants should kill the COVID-19 coronavirus*, Chemical and Engineering News assistant editor and specialised chemistry journalist Kerri Jansen stated:

"Enveloped viruses like SARS-CoV-2—which rely on a protective lipid coating—are the easiest type to deactivate... Quaternary ammonium disinfectants, commonly used in health-care and food-service industries, attack protein and lipid structures, thwarting the pathogen's typical mode of infection."

The above is a direct statement from the manufacturers of the Sure Shield hand sanitiser to address concerns of its non-alcohol based formula.

Should you have any further questions, or would like to order a 5L bulk refill container, contact TBC Distribution today.
