

POD PETITE WHITE

The Pod Petite Sanitary Bin in white. A slim-line hygienic and easy-to-use wall-mounted sanitary disposable system. Traditional sanitary bins are often regarded as unhygienic and unsightly, but the Pod Petite is the ideal solution to this disposal dilemma. The system combines contemporary form with clever features and is available in black or white. This manual unit can easily be converted to touch-free with the addition of an optional Auto-Sensor Box. The replacement liner system offers excellent cost savings when compared to fully serviced bins and allows for the flexibility of being able to empty full bins when needed without having to wait for a service technician.
