# Micro Stakes & Wire Stakes

Micro Stakes and Wire Stakes provide a solution for positioning of micro sprays for landscapes and orchards. Wire Stake Assemblies come with 914mm tube. Micro Stakes are available as a plain stake or fitted with differing lengths of tube to suit most installations.

## Features

- Tube piercing point on each Micro Stake tip allows creation of holes in laterals, removing the need for a separate installation tool.
- Retaining hole in Micro Stake to align and support offtake tubing.
- Galvanised Wire Stake assembly incorporates shut-off clip to stop flow.
- UV stabilised materials for long life.

## Applications

Landscape and agricultural orchard applications.
