Pavement Special	4 colours

Material

Webbing: Nylon

Snap Hook: Zinc

Die-cast ring: Zinc

Ring: Zinc

Nylon: A strong synthetic woven fibre with high abrasion resistance. The nylon webbing is woven tightly for improved strength and to avoid snagging.

Zinc: A strong and durable compound that does not rust and is resistant to other forms of corrosion.

Certification

Products undergo stringent testing to ensure your pet's safety.

Tested for: 1) Mechanical and Physical Strengths 2) Colourfastness.

Origin

Designed in Cape Town, South Africa. Manufactured in South Africa.

Wash Instructions

Surface clean only. Not machine washable.

⚠ Caution

*Purchase the correct style and size to ensure your dog's safety and comfort.
Replace Multi Lead if damaged in any way to avoid injury.*

Features and Benefits

Multipurpose

Multiple points of attachment.
Able to walk two dogs.

What is the use of a Multi Lead?

Our Multi Lead is all about function. Super easy to adjust with multiple uses. Use the multiple points of attachment for 6 different dog leash styles.

Safety

Improved control.

What makes the Multi Lead safe to use?

The Multi Lead in combination with any of our Collars or Harnesses allow you to control the direction and the distance between you and your dog(s). It also offers 6 different leash styles. The tightly woven webbing is soft and comfortable, which ensures a perfect fit and no irritation to the skin while out walking.

High Durability

Tough and long lasting.

What makes the Multi Lead highly durable?

Our metal components are tough, weather resistant, water proof, long lasting and versatile. The combination of our unique die-cast metal components combined with our tightly stitched webbing makes this product highly durable.

Multi Lead across 4 ranges	 Reflective Stitching	 Die-cast ring	 Multipurpose	 Safety	 High Durability
FANCY DRESS		x	x	x	x
UTILITY	x	x	x	x	x
ALPINIST		x	x	x	x
PAVEMENT SPECIAL		x	x	x	x

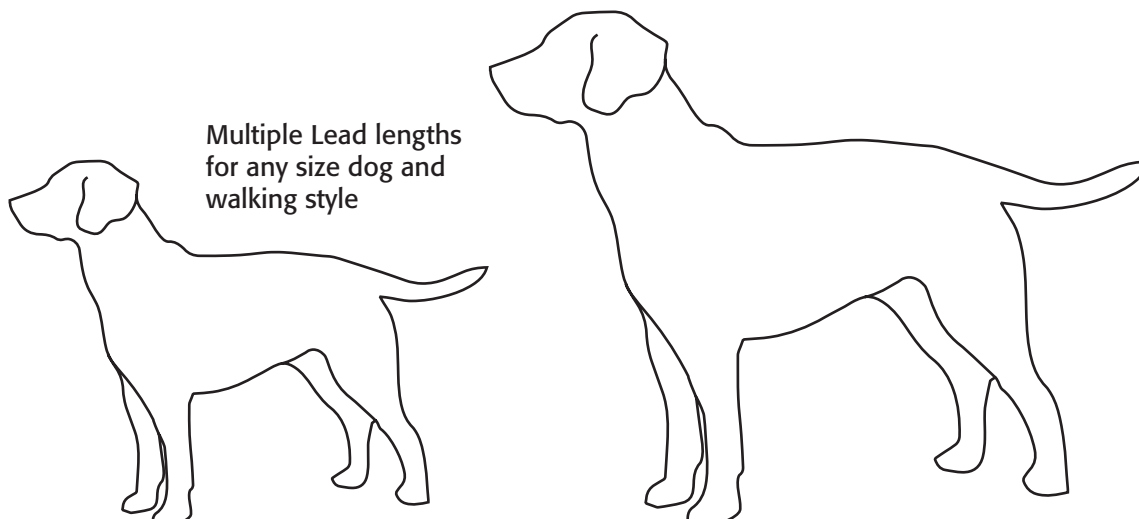

Pull Strength

Rogz caters for all shapes and sizes. Use our pull strength guide to ensure you purchase the right lead for your dog's walking style and pulling strength.

Dog Weight	Rogz Pull Strength Chart for Multi Lead			
	Small	Medium	Large	X-Large
Max 14kg	 Lead Length: 1.8m			
Max 18.6kg		 Lead Length: 1.6m		
Max 22.8kg			 Lead Length: 1.6m	
Max 37kg				 Lead Length: 1.6m

Dog Weight and Lead Length

The length of a lead will determine the amount of slack you choose for your dog. It should be long enough to provide slack but short enough for you to exert control and navigation. Depending on breed and your dog's pull strength, the shorter the lead the more control and safety you have over your furry friend. However the environment in which you use the Multi Lead also plays a factor in the length of lead you may choose for your dog's safety.

Function of the Multi Lead

Having control of your dog on walks is essential for a happy dog and a happy owner, and the right type of walking equipment can help. Our metal components are produced through die casting which produces geometrically complex metal parts through the use of re-usable molds, ensuring all our metal components are unique, highly durable and consistent across all ranges.

How to use the Multi Lead

These leads are all about function. Super easy to adjust with multiple uses. The Multi Lead offers 6 different dog leash styles.

1. Long Lead (1.6m)
2. Medium Lead (1.3m)
3. Short Lead (1m)
4. Double Lead
5. Temporary Tie
6. Shoulder Lead

Attach the larger trigger hook to the dog's Collar or Harness.
