CONTROL Collar

Available in 1 range & various colours

Utility

| 10 colours

M L XL

Material

Webbing: Nylon

Plastic components: POM Acetal Plastic Components

Die-cast ring: Zinc

Nylon: A strong synthetic woven fibre with high abrasion resistance. The nylon webbing is woven tightly for improved strength and avoids snagging.

POM Acetal Plastic Components: An injection-molded thermoplastic with high stiffness, low friction and excellent dimensional stability.

Zinc: A strong and durable compound that will not rust and is resistant to other forms of corrosion.

Certification

Products undergo stringent testing to ensure your pet's safety.

Tested for: 1) Mechanical and Physical Strengths 2) Colourfastness.

Origin

Designed in Cape Town, South Africa. Manufactured in South Africa.

Wash Instructions

Hand wash in warm water.

Caution

Purchase the correct style and size to ensure your dog's safety and comfort.

Replace Control Collar if damaged in any way to avoid injury.

We advise that you do not leave this collar on your dog unattended.

Features and Benefits

High Durability

Long lasting.

What makes the Control collar highly durable?

Our plastic and metal components are tough, weather resistant, waterproof, long lasting and versatile. The combination of our unique plastic and metal components combined with our tightly stitched webbing make this product highly durable.

Safety

Dog cannot back out of the collar.

What makes this product safe?

When a lead is attached to the die-cast ring, the pulling action tightens the hold on your dog's neck making it difficult to slip off, ensuring control and safety when out walking. We advise that you don't leave this collar on your dog unattended as it could be a choking hazard.

Reflective Stitching

Reflective yarn is woven into the webbing for night-time visibility.

What are the benefits of reflective stitching?

A single reflective yarn is woven into both edges of the webbing for great night-time visibility. No need to restrict where you take your dog for a walk, the reflective stitching pops in natural sunlight and illuminates in the dark when light reflects off the collar, making your furry friend visible in various conditions.

Control

Improved control.

How does this product help control my dog?

Applied pressure with the movement and sound of the chain aids in re-directing your dog, ensuring you maintain control.

Extra Strong

Solid metal attachment ring.

What makes this product extra strong?

POM Acetal Plastic Components: An injection-molded thermoplastic with high stiffness, low friction and excellent dimensional stability. Zinc: A strong and durable compound that will not rust and is resistant to other forms of corrosion.

Size

Rogz caters for all shapes and sizes. Use our size guide to ensure you purchase the right size Control Collar for your dog.

Dog's Neck Circumference	Medium	Large	X-Large
32 - 44cm 12 - 17"			
40 - 56cm 16 - 22"			
50 - 70cm 19 - 27"			

Measuring Neck Circumference

Measure the circumference of your dog's neck. A perfect fit is achieved when you can place 2 fingers between neck and collar. If your dog is at the upper limit of the size range, we recommend you purchase one size up.

Adjusting the Control Collar

The collar is set to the factory setting when purchased and can be adjusted to the biggest size indicated on the packaging card. Adjust the collar by feeding the webbing through the tri-glide slider in order to make it bigger. Once desired size is achieved, hold the tri-glide and buckle, pull taut to even slack.

How to Fit the Control Collar

- Slip the collar over the dog's neck
- Attach the lead to the metal ring (Image 2)

Rogz Control collar is specifically designed for walking your dog. Fit the collar so the chain is at the back of the dog's neck. Attach a lead to the die-cast ring. This allows the webbing part of the collar to press against the dog's neck when the lead is pulled maintaining control but not causing injury to your dog's neck. When no lead is attached to the collar the chain will automatically hang in the front. This could become a choking hazard.

WARNING: We advise that you do not leave this collar on your dog unattended.
