

Our JX-70 multifunction power analyser provides high accuracy single phase and three phase energy measuring and displaying, energy accumulating, power quality analysis, data logging and data communication.

Our JX-70 series meter is able to measure bidirectional, four quadrant kWh and kVarh. It provides maximum/minimum records for power usage and power demand parameters. Hardware has a standard built in a RS485 Modbus communication port , 4 Digital inputs, 2 Relay outputs, LCM and 2 MB flash for data-logging.

In addition, the meter provides TOU, voltage and current THD, harmonics up to the 31st and auto wiring change via software .
