RUN ON TIMER

1-25min Adjustable Exhaust Fan Timer

Product code: 5501060

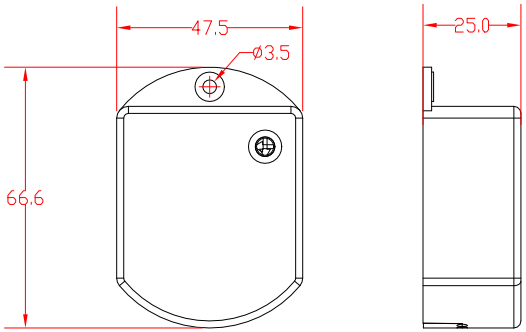

INSTALLATION

The timer module is designer to fit within a wall mounted electrical flush box or alternatively is located within a fan assembly.

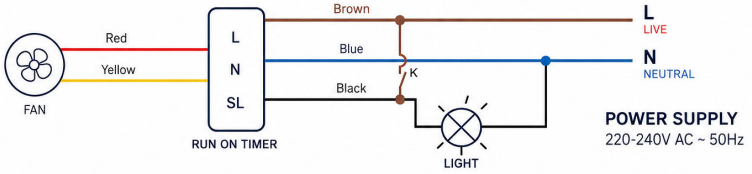

In both cases all wiring and installation should be completed by a qualified electrician complying with national wiring practices and using regulation terminal blocks to connect suppply conductors.

FEATURES

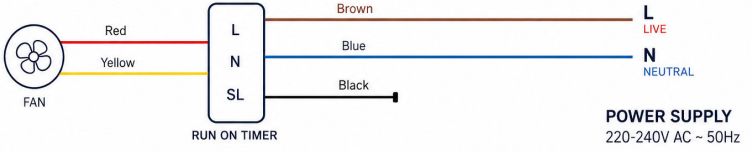

- The fan timer is a solid-state electronic timer designed to interface with most fans up to 200W with shaded pole and induction motors.
- This model is equipped with a timer which allows the fan to run on after the switch has been turned off. It is pre-set to 5 minutes and can be adjusted to 1, 5, 10 or 25 minutes by simply turning the dial on the run on timer.
- Can be fitted to new or existing fans.
- Not suitable for capacitor centrifugally switched motors.
- Not suitable for exhaust fans with thermostat circuit.
