MACHINE PLUS

DISHWASHING MACHINE DETERGENT

DESCRIPTION

Machine Plus is a pale amber liquid based on a blend of heavy duty alkaline detergents combined with soil suspending agents, anti-scaling components and a stabilised chlorine de-staining agent.

APPLICATION

Machine Plus is formulated especially for use with Automatic Dispensing Equipment. This is a complete hands-free system which ensures optimum concentration and economy of use of detergent is maintained at all times. The dispenser involves the use of a potentiometric probe which "senses" detergent concentration in the wash tank and signals the pump when to add more detergent.

BENEFITS

- Concentrated liquid - ensures economical dose rates.
- Contains anti-scaling agents - minimises the need to de-scale the dishwasher.
- Contains soil suspending agents - prevents redeposition of soils.
- Chlorine based - removes and controls all tannin and protein stains.

DIRECTIONS FOR USE

Machine Plus is dosed automatically through the dispensing unit and maintained at a concentration of 1 - 2 gm /litre. Operating temperature is normally between 75 - 80°C. Machine Plus should always be used in conjunction with Rinse Plus (Rinse Aid) to ensure all washed articles are completely clean and dry.

SUITABILITY OF CHEMICAL FOR FOOD PREPARATION AREAS

When used as directed Machine Plus is suitable for use in kitchens and food preparation areas

HEALTH & SAFETY INFORMATION

See separate Safety Data Sheet available on request.

PACKAGING

5 Litre Polyethylene drum or 15 Litre Polyethylene drum

PRODUCT:	CODE:
15 L	140110
5 L	140100
