## The ideal video management software for mid-sized installations

Unrestricted  
number of  
cameras

Unrestricted  
number of  
users

Multi-  
server

When you need video surveillance that gives you the complete overview, look no further than the XProtect Professional series.

Designed for mid-sized security installations covering multiple buildings, servers or locations, the XProtect Professional Series is IP video management software (VMS) supporting an unrestricted number of cameras and servers. It's ideal for institutions such as schools, museums, hospitals and production plants. The Series includes two high-performance VMS products, XProtect Professional and XProtect Professional+.

### Why XProtect Professional Series

- Designed for mid-sized installations with multiple buildings, locations or sites
- Complete visual overview of the entire installation so you can respond to incidents quickly
- Access your system from anywhere
- Integrate third-party software and business applications into your security system

### About XProtect Professional

With XProtect Professional, operators get a complete graphical overview of their security installation, so they can act quickly and provide accurate information to first responders.

### About XProtect Professional+

XProtect Professional+ builds on the capabilities of Professional and includes the ability for operators to centrally manage all servers, cameras and users in a multi-site installation. It's built with innovative technology designed to save you money and boost the overall performance of your hardware. With support for Edge Storage, XProtect Professional+ helps minimize the loss of video due to system issues and is the ideal choice for users who want a high-performing, cost-effective system prepared for the future.

# Which one should I choose?

If you need...	If you need...
Up to 320 cameras per server	To connect more than 320 cameras per recording server
Software designed for multiple servers	To centrally manage multiple servers spread over multiple sites
Multi-layer maps and full alarm management	To take advantage of the latest technology, such as H.265 compression, 4K and UHD cameras
	To add a layer of redundancy on recordings with Edge Storage
... then choose   XProtect <b>Professional</b>	... then choose   XProtect <b>Professional+</b>

Compare XProtect Professional and XProtect Professional+	XProtect <b>Professional</b>	XProtect <b>Professional+</b>
Type of deployment	Multi-server	Multi-server
Number of recording servers per system	Unrestricted	Unrestricted
Number of devices per recording server	320	Unrestricted
Maximum number of users	Unrestricted	Unrestricted
