

415V 5 Pin  
(PLUG NOT INCLUDED)

MOBILE

### AT A GLANCE

- ✓ For welding and grinding
- ✓ Used with globally known brands of Fixture Point Welding Tabletops
- ✓ Cleanable / reusable filter greatly extends filter life & reduces operating costs and consistent suction
- ✓ Built in Spark deflector reduces fire risk

### ALLCLEAR FP SERIES

The AllClear FP Series combines a precision fixture point welding table with integrated downdraft extraction, drawing welding fumes and grinding dust downward at the source. No overhead hood and no extraction arms getting in the way.

Full tabletop access allows unrestricted clamping and jiggling with globally recognised fixture systems, while consistent downward airflow keeps the work zone clear during welding and grinding. Made in Europe with a powerful 3-phase motor and cleanable filter, the FP Series delivers strong extraction with lower running costs.

**Not suitable** for plasma cutting or oxy-fuel cutting.

### Applications

- ✓ Cobots and robotics
- ✓ MIG and TIG welding

Product Code	Description	Table Size	Motor
WFP12T116	AllClear FP1200	1200 x 1200	2.4kw
WFP15T116	AllClear FP1500	1500 x 1000	2.4kw
WFP24T116	AllClear FP2400	2400 x 1200	4.8kw
WFP30T116	AllClear FP3000	3000 x 1500	4.8kw

### Table/Fixture Point Top Options (specify on order)

Hole Diameter	16mm	22mm	28mm
Top Thickness	100mm	150mm	200mm

### Specifications

Main Supply	415V 5 Pin (Plug required)
Filter	Single M Class >99%
Maximum Airflow	2300m3/h
Noise	74db
Filter Cleaning	Manual
Dust Collection	Large removable dust collection tray
Speed Control	Yes, Variable fan speed control
Working Height	725mm (Excluding Table top thickness)
Load Capacity	600kg/m2
