

JARI ACTIVSTOOL

Jari means movement.

It is impossible to actually sit on a Jari Activstool, no lying back, no slouching and definitely no sitting still. With a rotating convex base Jari forms one leg of a stable tripod, your own legs provide the other two parts. That means you are constantly flexing, adjusting and moving; **the ideal way to stay focussed and concentrate.**

But the coolest thing about Jari Activstool is that it is **gas height adjustable**. That means it fits a huge range of students and just about any application:

- Classrooms
- Libraries
- Study groups
- Open spaces
- Collaborative learning
- Behind a desk or on its own

No longer do you need various sizes of stools to suit the range of your student population, Jari Activstool adjusts to suit almost everyone in a senior school environment, right up to adult size.

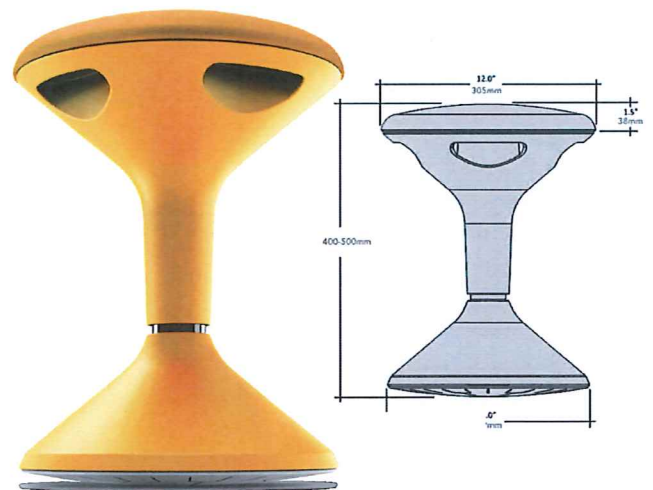

JARI ACTIVSTOOL

you can buy all of these...
