INNOVATIVE ULTRA FLUSH TECHNOLOGY

Ultra Flush combines innovative flushing technology with practical design to provide a hygiene rimless flush that enables maximum flush with minimal water consumption.

RIMLESS ULTRA

A rimless toilet replaces the traditional flushing rim with a more advanced rimless flush. This provides hygienic benefits by eliminating places for germs, dirt & debris to accumulate.

EASYCLEAN

The super smooth surface reduces the buildup of bacteria whilst its seamless shape leaves no hard to reach places making cleaning a breeze.

WELS

Intelligent bowl design not only ensures thorough cleaning but also water saving.

4 STAR
4.5L PER FULL FLUSH
3L PER HALF FLUSH

ASSEMBLY

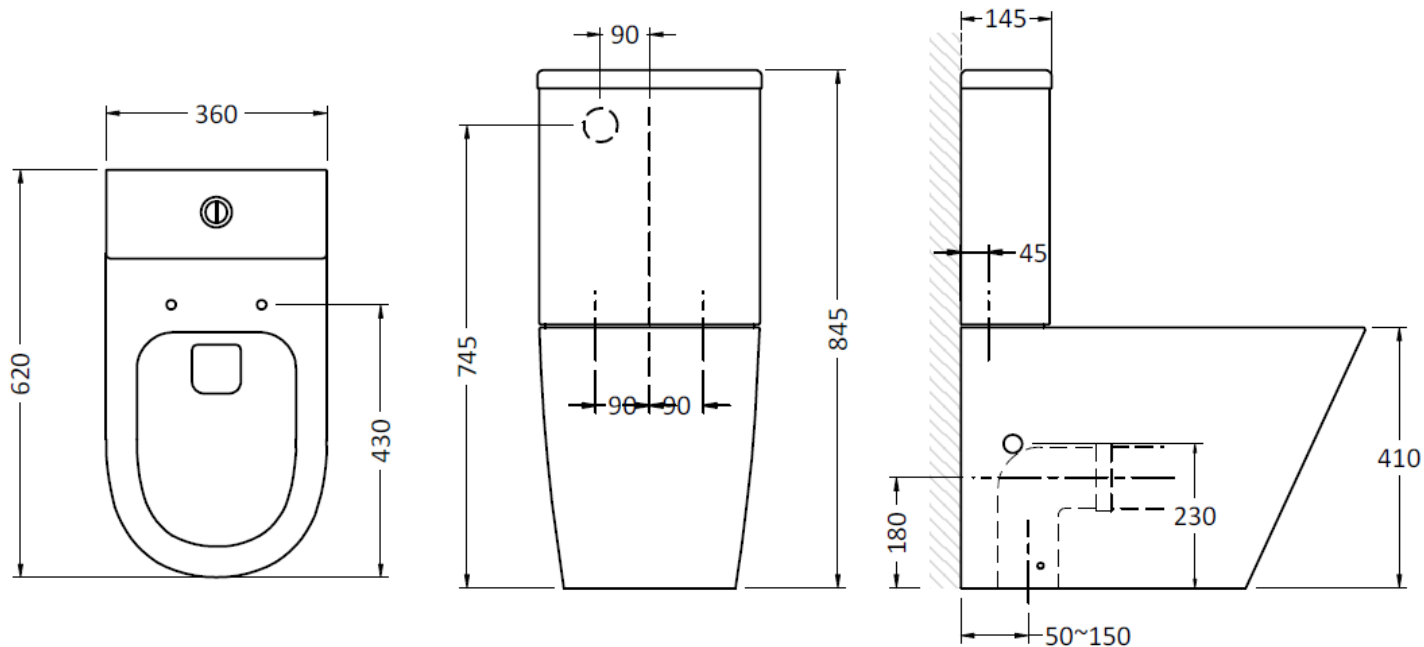

Practical parts and design make for efficient and easy installation. Whilst removable parts keep maintenance simple.

SOFT CLOSE

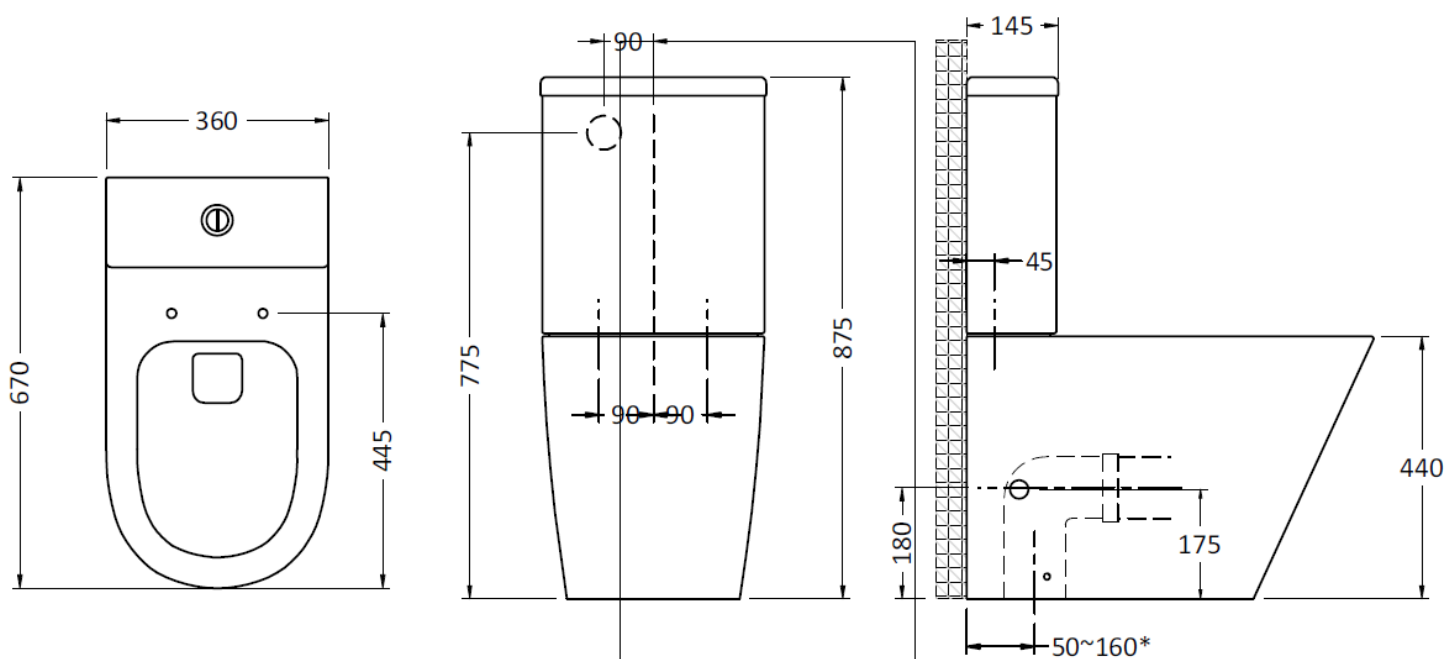

Soft close seat technology reduces the noise collision of seat & pan.
